Installation

Procedure Overview

This document provides instructions for installing a cooling fan assembly in an OmniRx CT orOmniTT CT cabinet, using manufacturing kit 20-0057.

Procedure Type	Field Retrofit
Products Affected	OmniRx and OmniTT Color Touch cabinets manufactured prior to April 2004
Optional/Mandatory	Optional; as needed
Purpose	Install as needed to increase airflow to the console, and reduce heat distribution to the uppermost drawers

Parts Required

To perform this installation procedure, order the following kit from Omnicell Order Entry. For detailed kit information, see “Appendix A: Parts” .

Part Number	Quantity	Ordering Description
20-0057	1	Kit, Cooling Retrofit, OmniRx

Tools Required

- T-10 Torx Driver
- 1/4" Nut Driver

© 2011 Omnicell, Inc.

Installation Instructions

The following are instructions for installing a cooling fan assembly in an OmniRx CT or OmniTT CT cabinet, using manufacturing kit 20-0057. See "Procedure Overview" for information on the parts and tools referred to in these instructions.

Important: Put on an ESD wrist strap and secure it to ground, prior to handling any electronics.

Note: If the cabinet contains medications, an authorized pharmacy representative must be present during the procedure

Prepare the Cabinet

1. Power down the cabinet, and disconnect power.
2. Open the cabinet lid.
3. Check if the unit has a keyboard cover bracket installed; if not, install the cover bracket provided in the kit (required).

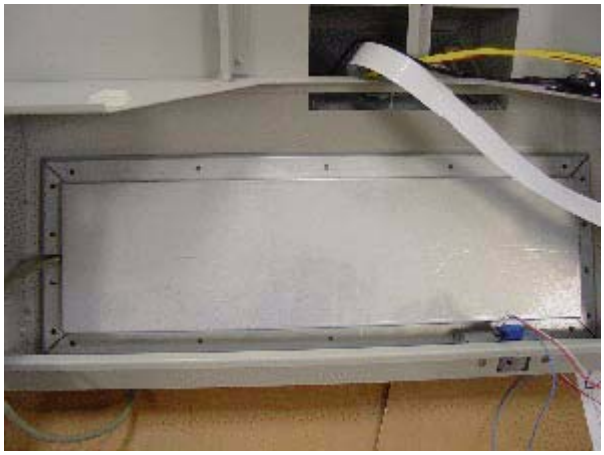

Figure 1-1. Keyboard cover bracket

Install the Pressure Plate

1. If not already done, remove the center nuts from the top and bottom of the keyboard cover bracket.
   - Nuts: #4 Hex
   - Tool: 1/4” Nut Driver

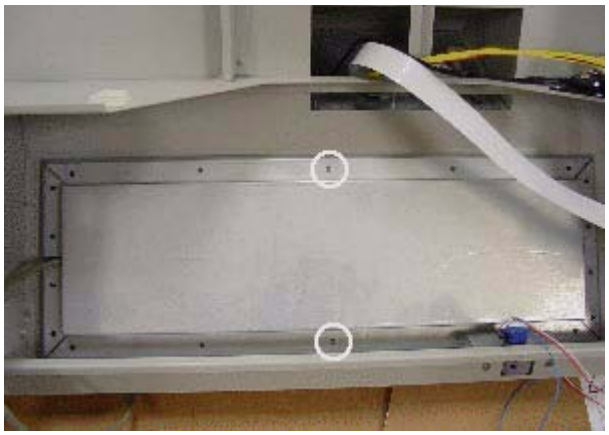

Figure 1-2. Keyboard cover bracket nuts

2. Install the pressure plate, by placing it over the two center posts and re-installing the two nuts.

   In order to fit the plate over the keyboard bracket, bend it slightly, maneuver it onto the bracket, then bend it back.

Figure 1-3. Installing the pressure plate

Install the Fan Assembly

When properly installed, the fan assembly lies to the left of the pressure plate (as viewed from the rear of the cabinet).

1. Loosen the three screws on the fan assembly and slide into the three corresponding slots on the center, vertical wall of the sled.
   - Screws: 6-32 Button-head
   - Tool: T10 Torx Driver

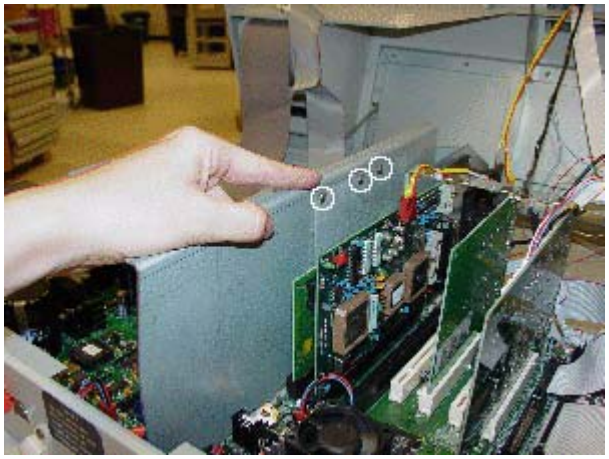

Figure 1-4. Slots for fan assembly screws

2. Make sure the fan assembly is flush with the floor of the sled and route cables as follows:
   a. Route the keyboard cable through the dedicated slot in the front of the bracket.
   b. Route the hard drive power cable through the dedicated slot in the rear of the bracket.
   c. Route all other cables through the 1" opening near the center of the bracket.
      Cables may need to be disconnected and reconnected to route through this slot.

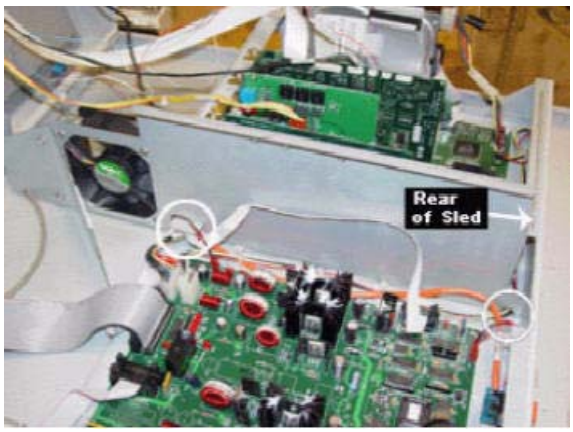

Figure 1-5. Routing cables

3. Tighten the three screws securing the fan assembly to the sled.

4. Connect the fan power cable to J15 on the UPS board.

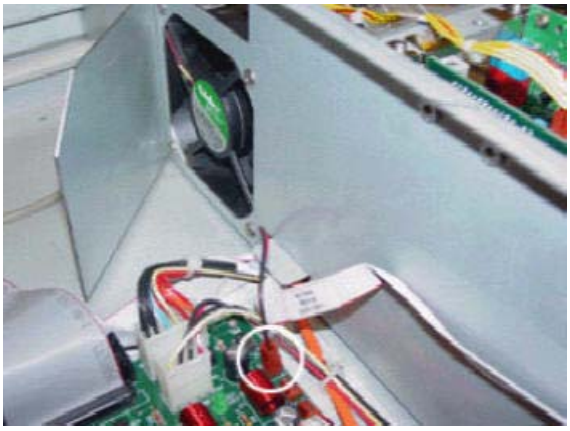

Figure 1-6. Connecting the fan power cable

5. Verify that the cabinet lid will open and shut completely without damaging any cables, then close and lock the lid.
6. Reconnect cabinet to power and reboot.
